

THERMO PINE

We import and market thermally modified wood from Finland (Europe), for our esteemed customers who really want the best. Regardless of your budget and appearance choices, we can assist you with the best outdoor and indoor wood solutions for you or your customers. Before presenting it to you, we have researched all the choices and have found this wood as the best choice of today.

Thermowood is produced by using only high temperatures and steam. This natural wood product is suitable for both indoor and outdoor use. It is attractive, durable and non toxic. It is remarkably dimensionally stable and easy to machine and work.
