Regardless of your budget and appearance choices, we can assist you with the best outdoor and indoor wood solutions for you or your customers. Before presenting it to you, we have researched all the choices and have found these deck tiles as the best choice of today.

Mix Color  
Real Wood Finish

Wood-plastic composites (WPCs) are composite materials made of wood fiber/wood flour and thermoplastic(s) (includes PE, PP, PVC etc.). In addition to wood fiber and plastic, WPCs can also contain inorganic filler materials. In recent years, people in the flooring industry starts referring to WPC as a type of floor that has a basic structure of top vinyl veneer plus a rigid extruded core (the core can be made without any wood fiber). WPC is now an established product category. This can be use indoor as well as outdoor .
